BALLABGARH: Wildlife plays an important role in balancing the environment. Wildlife provides a stability to different processes of the nature. Wildlife and nature have been largely associated with humans for emotional and social reasons. The importance of wildlife can be categorized as ecological, economic and investigatory importance as well as conservation of biological diversities etc. The conservation of wildlife is necessary for prevention of drought, new deserts, fires as well as flood. Also, this conservation ensures that the upcoming generations of human and wildlife will be surrounded by nature thereby loving it and understanding the significance of wildlife. Also, wildlife acts as a gene pool for various resistant strains of pests causing the diseases. Eco and Energy Conserva-
